

Modern Inspired Blue Turkish Souf Rug no. r4201

Description

A Turkish souf rug in blues and creams. Souf rugs are very rare technique found as they have a raised low and high pile technique. They are popular in Iran and little understood elsewhere except by Persians and people who really know Fine carpets. They have a 3-D dimensionality that you can't find in other carpets. Additionally a Souf is art it is not meant to be walked upon. A Souf is a rug that combines flat-weave and pile. Typically the ground is done in flat-weave and the design is executed in pile. Metal wrapped thread is often used. Kashan is traditionally the home of Souf rugs but we also see them from Qum. There are also tribal Soufs which we believe come from Khorasan.
