

Antique Tabriz Botanical Distressed Rug no. j4868

Description

Design: An all-over botanical pattern with stylized palmettes, leaves, and small floral motifs rather than a central medallion. This is very characteristic of many Tabriz workshop designs. **Color palette:** Soft, muted tones—beige, sand, light gray, and faded brown—suggest either natural age or intentional distressing (often called stone-washed or vintage-washed). **Pile & texture:** The rug looks very low pile, almost flat in areas, which is typical of older Tabriz rugs or newer rugs that have been sheared down to create an antique look. **Weave & structure:** The back and folded corner suggest a fine weave, most likely wool pile on a cotton foundation, which is standard for Tabriz rugs. **Border:** Multiple narrow borders with delicate floral elements—another Tabriz hallmark.
